To install software “DiveLogBook” for Compass+ and Data+:

1. Please download the appropriate file according to your computer’s operating system (Windows 7, Vista or XP). Once done, you will find a file containing two folders entitled “APP” and “plugin”.

2. Enter the “APP” folder and run file “setup.exe” to set up the software:

4. Your dive computer’s software installation is now completed. You can run the programme by double-clicking the “Divelogbook” icon on your table top (if selected) or find it in your programme list.

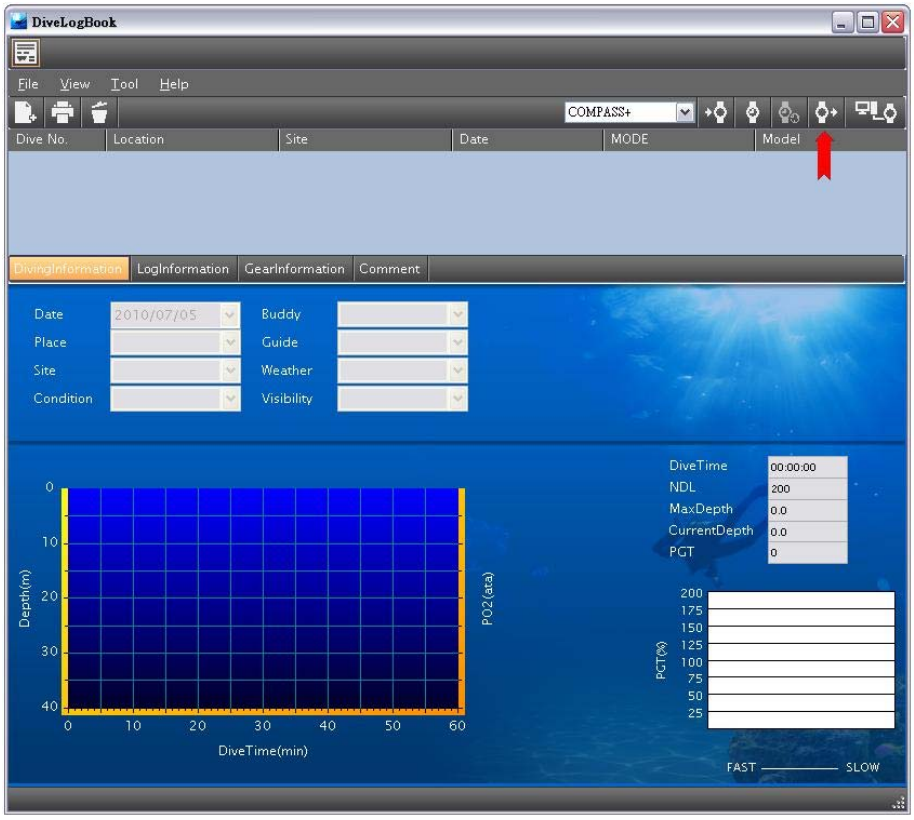

To retrieve information from your Data+ or Compass+:

1. Run the DiveLogBook programme and select the model of dive computer you are using.

2. Set your dive computer on PC mode and connect your IST PCI-3100 interface (sold separately) to a USB port on your computer and line up the contact points as shown.

3. Click the “GetLogData” icon to initiate data transfer. The green light on top of the interface should be flashing at the same time.

To uninstall / re-install “DiveLogBook”:

You can either use the “add / remove” software function in your Window’s control panel or run the same “setup.exe” file in the “APP” folder which was used to setup the DiveLogBook.
